

## ARCHITECTURAL CONTROL PSL PROUD SERIES

### 16 Scene Slide Fader

Proud Intelligent lighting controller. Proud Series Lighting controller is a development from Lunar Series. It's superior technology allows digital lighting control and the ability to handle complex and large scale projects. Proud Series is convenient to setup and is suitable for Architectural lighting.

### PSL-1648

#### Feature

1. Circuit controlled by microcontroller.
2. Up to 16 program setting scene.
3. Up to 16 program setting sequence 16 steps.
4. Control output 48 Ch.
5. Slide faders and scene combine for comprehensive control
6. Can be select enable and disable Master fader control
7. On/Off function or manual control
8. Copy scene and sequence function
9. Can be link control up to 8 station and select master control
10. Can be control fade time and speed of sequence by slide fader
11. Fade time setting for scene change (0-30 minutes)
12. Indicating LED. Display
13. Emergency system connection
14. E<sup>2</sup> PROM data loss protection system (no need for battery back-up)
15. A choice of wall mount, on deck and Rack Cabinet
16. Compatible with control Proud series
17. Can be room combine and separate
18. DMX-512 output conforming with USITT DMX-512 (1990) Protocol
19. Power supply 18-24 V.DC.

#### Model Information

PSL-1648 16 Scene 48 Slide Fader

#### Dimension

PSL-1648 (WxHxD) 270 x 115 x 57 mm.
